

# Questionnaire over Rotation of the Sun.

**Confirmation of rejection or acceptance of the discovery claim over true reason behind rotation of the Sun:**

**Two answers have been stated ahead;**

- (a) Answer to reject discovery claim and  
(b) Answer to accept discovery claim.

Please respond with your confirmation by selecting anyone of the answers over the website [www.newtonugeam.com](http://www.newtonugeam.com) duly sign and stamped.

Or reply whatsoever you or your organization like(s) to write over my discovery claim but please do not remain silent. **Your answer is required to come at the conclusion that what is correct.**

**Academic qualification required to understand true reason behind rotation of the Sun:**

**(It is very easy to give judgment by giving vague answers to queries as stated ahead; a Science Graduate is fully competent to give the correct answer in a simple scientific manner).**

Problem of wrong knowledge over challenged subjects is going on with the World for centuries because no concerned Scientist/Astronomer/Astrophysicist contradicts wrong observation/understanding of the other; every concerned remains confined to themselves. Finally, the Nature has given the said task to an outsider concerned Citizen Scientist Ramesh Varma (India) to rectify the World's wrong knowledge over the challenged subjects.

**Bitter truth is that contrary discovery claim mostly originates from the 'outsider concerned'. Said truth makes the task extremely difficult in spreading the correct knowledge over the Globe among the concerned.**

Further, Science Community by not accepting discovery claim of the Challenger when it was declared first through the Press Conference at Chandigarh on 7th April 2007 and even after 12 years by not responding like a true Scientist; they have put the Discovery claimer in the opposition because his discovery claim is contrary to the Science Community's understanding and knowledge. So, the discovery claimer cannot write in the way/mode like other discovery claimers write; sorry for it.

**Discovery claimer would like to say something to the concerned before they offer their rejection/acceptance versions/answers:**

- Discovery claimer attempted to make the concerned aware over his discovery claims from the year 2007 through his book 'MATERIALISTIC UNIVERSE' and later through some Booklets titled (Science Hits; Origin of the Moon; Formation of Hexagonal vortex over the North Pole of the planet Saturn and some others). He invited **three** Press Conferences at Chandigarh (India) from the year 2007 to 2019 and most of the Reputed Newspapers published discovery claims of the Discoverer. He posted and e-mailed discovery claim letters number of times to most of the concerned scientists and organizations of India and of the World. Besides this, he has written several letters to the Rulers of the Nations but nothing positive has been achieved till date due to 'human mind setup'. Recently in the year 2018-19 Discovery claimer has installed some hoarding at his newly constructed **Science Temple** (True Astronomy and Sciences, Village Jallah, Chandimandir-Morni Road, Distt-Panchkula, Haryana, INDIA) over some phenomena to challenge the World and to make General Science Concerned aware that what is correct.

- Human mind set is such that it does not accept any new correct understanding easily and early if the understanding is contrary to their belief and to the World's understanding which has existed from centuries. Example from the history over the acceptance of round earth has the proof. Human (Concerned Scientists) took 2300 years to finally accept in the 17th century that the Earth is round and a planet; whereas prior to 600BC entire human race was with the understanding that the earth is flat. Now similar history is being repeated again over the same subject 'Astronomy' due the concerned's mind-set.

Below stated truth of the present era is shocking to know that if the Concerned Scientist (American Astrophysicist Eugene Parker) has to face wrath from the Science Journals in getting his discovery published on being contrary to the existing understanding of that time then what kind of harassment an outsider concerned would have to face from the Science Journal Community to get his discovery claim published in any reputed Science Journals?

The American Astrophysicist Eugene Parker in the year 1957 suggested that Sun continuously ejects stream of particles to fill the space and named it as Solar wind. Concerned Journals then rejected and declined twice to publish it because concerned Scientists then had the understanding that Space is vacuum. Something more about it has been exhibited below.

<b>What does the World understand?</b>
<b>From Newspaper The Tribune (WORLD) dated 13/08/2018</b>
<b>Dr. American Astrophysicist Eugene Parker is the man behind now of 91 years old Scientists for whom the NASA's Solar Probe is named.</b>
<b>How Indian American Astrophysicists Subrahmanyan Chandrasekhar played key role then in getting his discovery published?</b>
Mankind's first mission to 'touch' the Sun may have panned out differently had it not been for Indian-American astrophysicist Subrahmanyan Chandrasekhar. When 31-year-old Dr Eugene Newman Parker back in 1958 suggested the existence of solar wind and that charged particles streamed continuously from the Sun and fill up the space, the scientific community refused to believe him. The prevailing opinion at the time was that the space was total vacuum. "When he submitted his paper detailing his theory to the Astrophysical Journal, the most prominent research journal of the field, it was rejected twice by two different reviewers who were asked to provide opinions," Dibyendu Nandi, an associate professor in Kolkata, said. "Senior Editor of the Astrophysical Journal, Indian-American astrophysicist Subrahmanyan Chandrasekhar, intervened and overruled the reviewers and allowed the idea to be published," said Nandi. PTI

- Present problem with the Discovery Claimer from the Concerned Scientists/Astronomers and Science Journals is due to the following reason which is coming in the way to make the World aware that what is correct.

Concerned Scientists/Astronomers have adopted a mode to read discovery claim for peer review only which appears in the reputed Science Journals and they specifically do not read unsolicited discovery claim irrespective of its importance and in case if it is read, they prefer to remain silent because of the reasons as stated over the website.

Further; reputed concerned Science journals do not have the Scientists; they are just publishing houses. Due to the said reason, they accept for publication any discovery claim only if it is from the Academic Concerned Scientist/Organization; others do not find any space in their journals.

- Discovery claimer approached the Chief Editor of a very reputed Newspaper through his friend to publish a small article over his discovery claim in their Newspaper, which article was/is obviously contrary to the World knowledge. The Chief Editor told the Discovery Claimer that The Press does not have the Scientists to understand correctness of his article; hence unable to publish it. He however suggested that to break the ring formed by the Scientists and the Journals; he must do PhD over the claimed subject to enter into their ring to smash it. His suggestion is appealing but not

practical. (Any person born in Religion 'A' and having deep faith in it cannot do PhD in other Religion 'B' and vice versa).

- Discovery claim over 'Rotation of the Sun' is a fractional discovery claim of the total discovery claim under title '**Materialistic Universe**' which is over the subjects Astronomy (Working mechanism of the solar system or of the Universe) and Physics (Unique materialistic particle properties of the rays and true states of the matter). If one link of the chain is broken, the whole chain would lose its grip; so, discovery claim selected presently only over one phenomenon 'Rotation of the Sun' is sufficient to sink the ship with false and wrong understandings over the stated subjects.

**To accept or to reject the claimed discovery over the reason behind rotation of the Sun; please answer (reply) duly signed and stamped either of the below stated two answers:**

**(a) Answer to reject discovery claim:**

**After going through the contents of the Booklet over discovery claim (2007) by Ramesh Varma (INDIA) titled: 'How does the Sun rotate?'; it has been concluded that:-**

(i) Sun still rotates by the conservation of angular momentum which it had got at its formation from the rotating Nebula; now there is no other force to rotate the Sun as claimed 'rotation force' by the back thrust from outgoing materialistic particles curved rays along with other solar ejects.

(ii) Scientists' have noticed that rotation speed of the Sun is faster at the equator and slower at near to its Poles but the difference in rotation of speeds between the particle matter of the Sun does not pose any friction or retardation to the faster rotating particles because of the reason as stated below:.....

(iii) Further, Scientists have noticed that Sun is a perfect sphere (almost perfect sphere) and has not bulged out at its equator due to its faster rotation. Spherical shape of the Sun is not due to back thrust from its outgoing materialistic particles curved rays along with other solar ejects as claimed by the Challenger. But spherical shape of the Sun is due to the reason as stated below: .....

(iv) Though the Sun (gassy Sun) is a perfect sphere and has not bulged out at its equator in spite of its faster rotation but Nebula of dust and gasses on its compactness towards its centre due to its gravity by the grace of God dramatically spun so fast that its shape transformed to a thin disc of vast diameter and that is why the solar system is almost over a flat plane. Solar family is over a flat plane not due to the trap zone, (which Scientists have not noticed or seen) formed by the mirror reflection image pattern from the outgoing materialistic particles curved rays of the Sun along with other solar ejects as claimed by the Challenger.

**OR**

**(b) Answer to accept discovery claim:**

**After going through the contents of the Booklet over discovery claim (2007) by Ramesh Varma (INDIA) titled: 'How does the Sun rotates?'; it has been concluded that:-**

(I) Till date no one concerned has linked notice of different speeds of the Sun; faster at its equator and slower near to its Poles with the centuries old understanding that the Sun rotates due to the conservation of angular momentum got from the rotating Nebula from which the solar system has been formed. Friction caused due to the different speeds between the Sun's matter has ceased conserved angular momentum if any and now the Sun rotates due to the back thrust got from its outgoing materialistic particles curved rays as claimed by the challenger.

(ii) Till date no one concerned has given a thought about reason behind rotation of the Sun with different speeds; faster at its equator and slower near to its Poles. The reason claimed by the Challenger that different speeds of the Sun is due to the back thrust at its every particle by the outgoing materialistic particles curved rays is correct.

(iii) Till date it is a mystery with the concerned that why does the Sun has perfect spherical shape in spite of its faster rotation. The reason claimed by the Challenger that shape of the Sun is a perfect sphere due to the back thrust at its every particle by the outgoing materialistic particle curved rays is correct.

(iv) Till date it is being understood that solar system is over a flat plane due to dramatically faster rotation of the solar Nebula which transformed shape of the solar Nebula of dust and gases to a thin disc of vast diameter from which the Solar system formed.

Spherical shape of the Sun (Sun formed of particles and gases) in spite of its faster rotation suggests that centuries old understanding is wrong. Solar family is over almost a plane due to the trap zone formed by the outgoing materialistic particles curved rays by forming a mirror reflection image pattern over its (Sun's) equatorial plane as claimed by the Challenger.

**OR**

**Reply whatsoever you or your organization like(s) to write over my said discovery claim but please do not remain silent.**

Your silence would keep the World under dark about the challenged subjects. Students would be taught wrong to keep the wrong knowledge cycle going on. Your silence in response to my previous letters/e-mails and other modes to make the Scientists aware about the discovery claim has resulted to waste more than twelve years of the Concerned Scientists and Students and also has wasted trillions and trillions of dollars over the research and Space exploration due to the wrong basic knowledge over the challenged subjects (for example over the Sun\*).

**\*Sun:** NASA's Parker Solar Probe would provide some useful information but it would not provide answers for which it has been sent unless the Concerned rectify their basic knowledge over the challenged subjects. Answers by simple Science with the correct basics knowledge to most of the mysteries for which Parker Solar Probe has been sent closer to the Sun have already been discovered and claimed by the Challenger which is over the website.

---

---

## **Get a Reward<sup>#</sup> of ₹ 50 Lacs** **(Equivalent US Dollars)**

**by proving the discovery over working mechanism of solar system based over discovered and claimed true materialistic particle properties of the rays and true states of the matter as wrong and incorrect.**

(If the Discoverer/Challenger had trillions of dollars with him, he would have announced a reward of billions of dollars instead of announcing a mere reward of Rupees fifty lacs or equivalent US dollars).

# Reward claim can't be filed anywhere else, except under the Jurisdiction of Chandigarh (UT) India and for other terms and conditions see the website.

By not being able to prove his discovery claim as wrong; it is obvious that you have been taught wrong (Or you have wrong knowledge over the said phenomena or over the subjects Astronomy and Physics). In such case, to make the World aware of that what is correct; please support the Discoverer/Challenger (Ramesh Varma).

**Discoverer and Challenger: Ramesh Varma (India)**
